Where Predictions Become Markets

Decentralized Prediction Markets for Everyone

Trade the probability of future events and discover market-driven insights powered by collective intelligence.

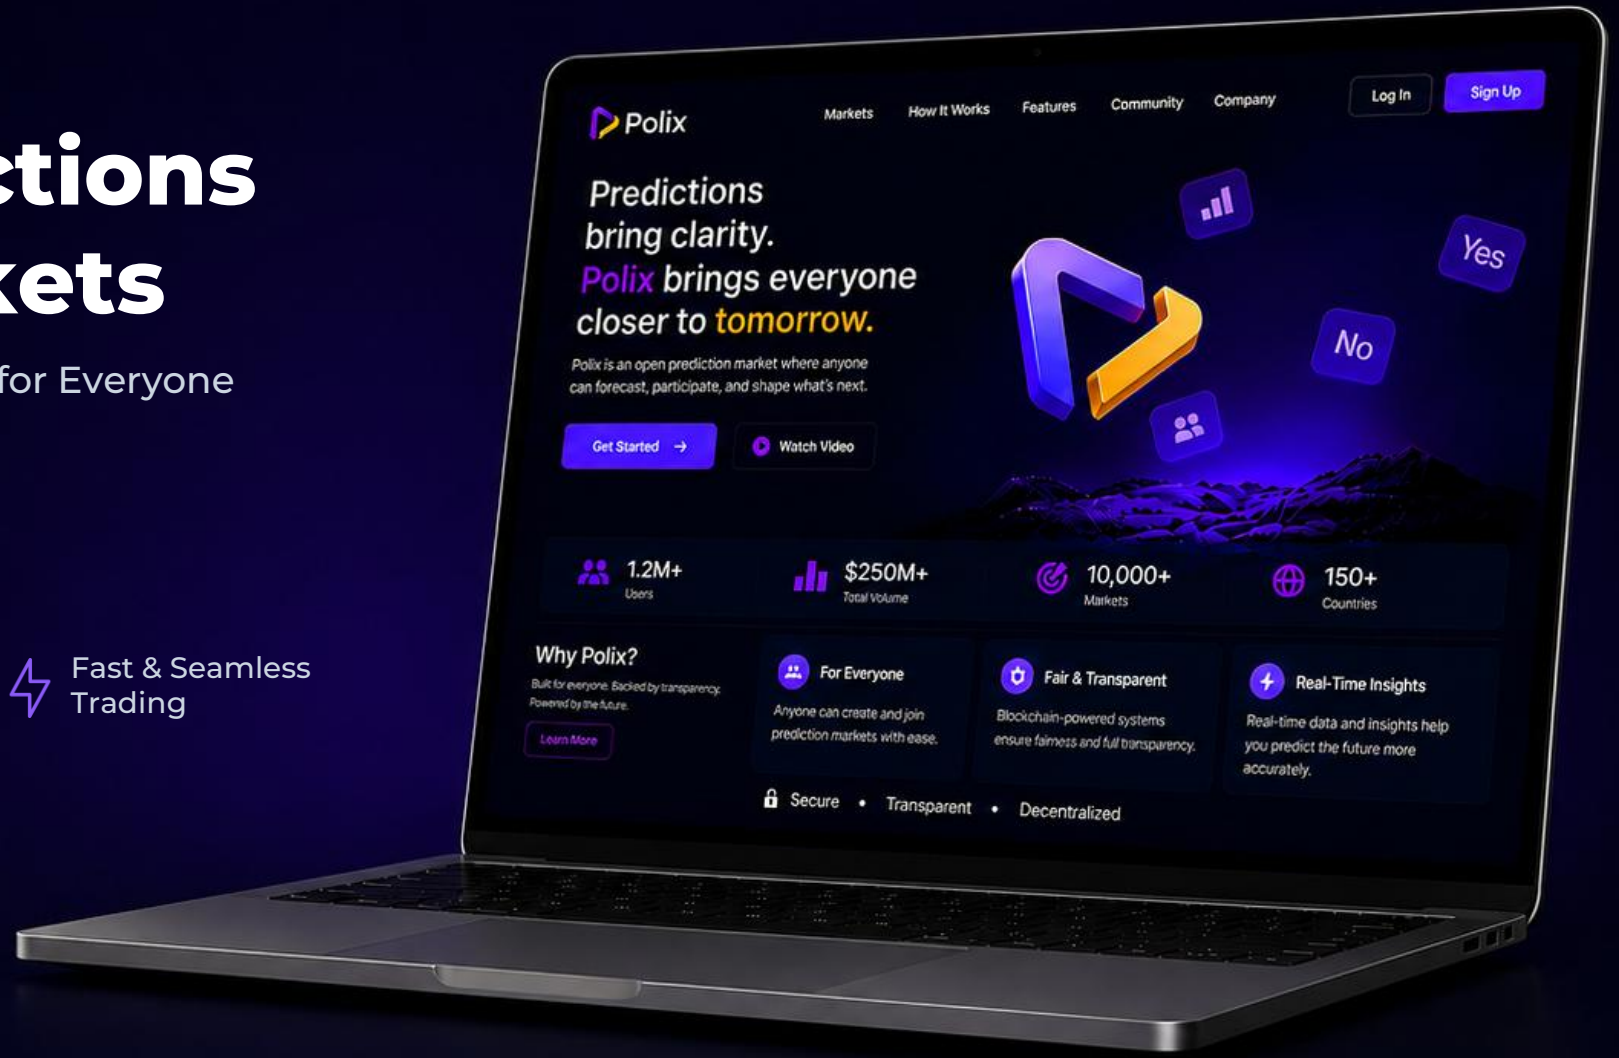

Real-World Markets

Transparent & Decentralized

Fast & Seamless Trading

Understanding Prediction Markets

Where **collective intelligence**
meets market-driven forecasting.

What is a Prediction Market?

A market where participants trade the **probability** of future events.

EXAMPLE

Will Bitcoin reach
\$150,000 by Dec 31, 2026?

68%

Market Probability

Market Consensus

YES

Likely Outcome

How Prediction Markets Work

Participants continuously buy and sell outcomes, driving real-time probabilities through market activity.

Collective intelligence transforms opinions into probabilities.

Collective
Intelligence

Why Prediction Markets Matter

Prediction markets aggregate the knowledge, opinions, and insights of thousands of participants.

Unlike traditional polls or expert forecasts, market prices continuously update to reflect real-world expectations.

Collective intelligence often produces more accurate forecasts than individual experts.

Real-Time

Market-Based
Forecasting

Collective
Intelligence

Prediction Markets vs Traditional Forecasting

Why market-based forecasting often outperforms traditional methods.

Traditional Forecasting

Polls

Survey-based predictions.

Expert Opinions

Individual judgment driven.

Static Data

Historical information only.

Limited Participation

Small participant pool.

VS

Prediction Markets

Real-Time Signals

Live market information.

Collective Intelligence

Wisdom of the crowd.

Continuous Updates

Always evolving probabilities.

Global Participation

Open to everyone worldwide.

Real-World Use Cases

Prediction markets can be applied across politics, finance, crypto, sports, AI, and real-world events.

Industry Overview

Prediction markets are positioned at the intersection of information, finance, and global participation.

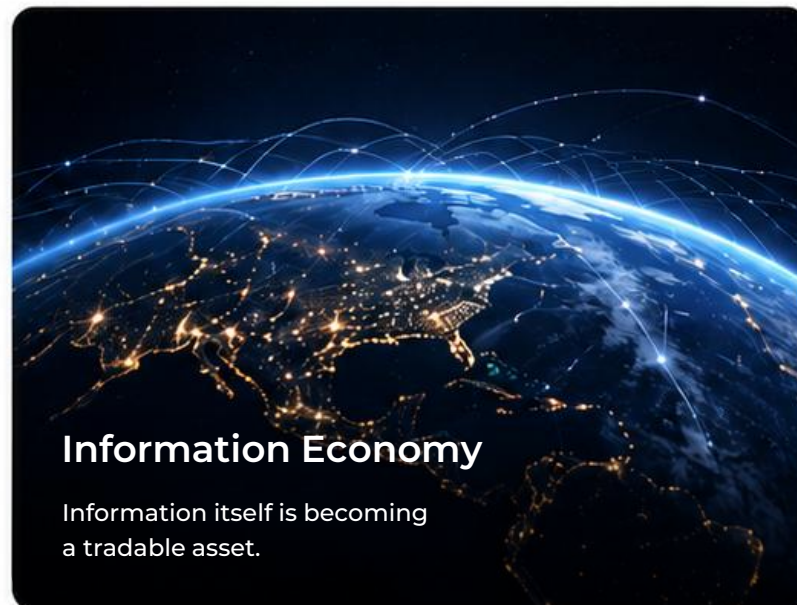

The Next Major Market Category Is Emerging

Why Now?

Four structural trends are accelerating the adoption of prediction markets worldwide.

The convergence of AI, crypto, and global connectivity is creating a new market category.

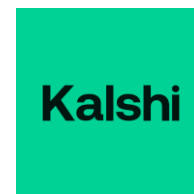

Current Market Leaders

Leading platforms have already proven real-world demand for prediction markets.

Largest decentralized prediction market

- ✓ Global leader in trading volume
- ✓ Millions of active users worldwide
- ✓ Covers politics, crypto, sports, and more
- ✓ Crypto-native and permissionless

Regulated event trading platform

- ✓ US regulated exchange
- ✓ Event contracts on real-world outcomes
- ✓ Retail and institutional participation
- ✓ Backed by leading investors

Pioneer in online prediction markets

- ✓ Long history and proven track record
- ✓ Active community of traders
- ✓ Political and public policy markets
- ✓ Established user trust

Community-Driven Prediction Platform

- ✓ User-generated markets
- ✓ Highly engaged community
- ✓ Experimental market formats
- ✓ Rapidly growing ecosystem

Problems & Opportunities

Key industry challenges are creating opportunities for the next generation of prediction markets.

CURRENT CHALLENGES

Limited Market Creation

Most platforms restrict who can create markets.

Fragmented Liquidity

Users and volume remain isolated across platforms.

Complex User Experience

Prediction markets are still difficult for mainstream users.

Weak Creator Incentives

Creators receive limited rewards for generating markets.

MARKET GAP

NEXT OPPORTUNITY

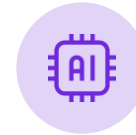

User-Generated Markets

Anyone can create and launch prediction markets.

Aggregated Liquidity

Unified liquidity across multiple platforms.

AI-Powered Experience

AI assists forecasting, discovery, and trading.

Creator Economy

Revenue sharing and incentives for market creators.

The Next Generation Prediction Ecosystem

POLIX combines AI, liquidity, creator incentives, and network-driven growth into a unified prediction ecosystem.

AI Intelligence

AI-powered forecasting and market discovery

Liquidity Hub

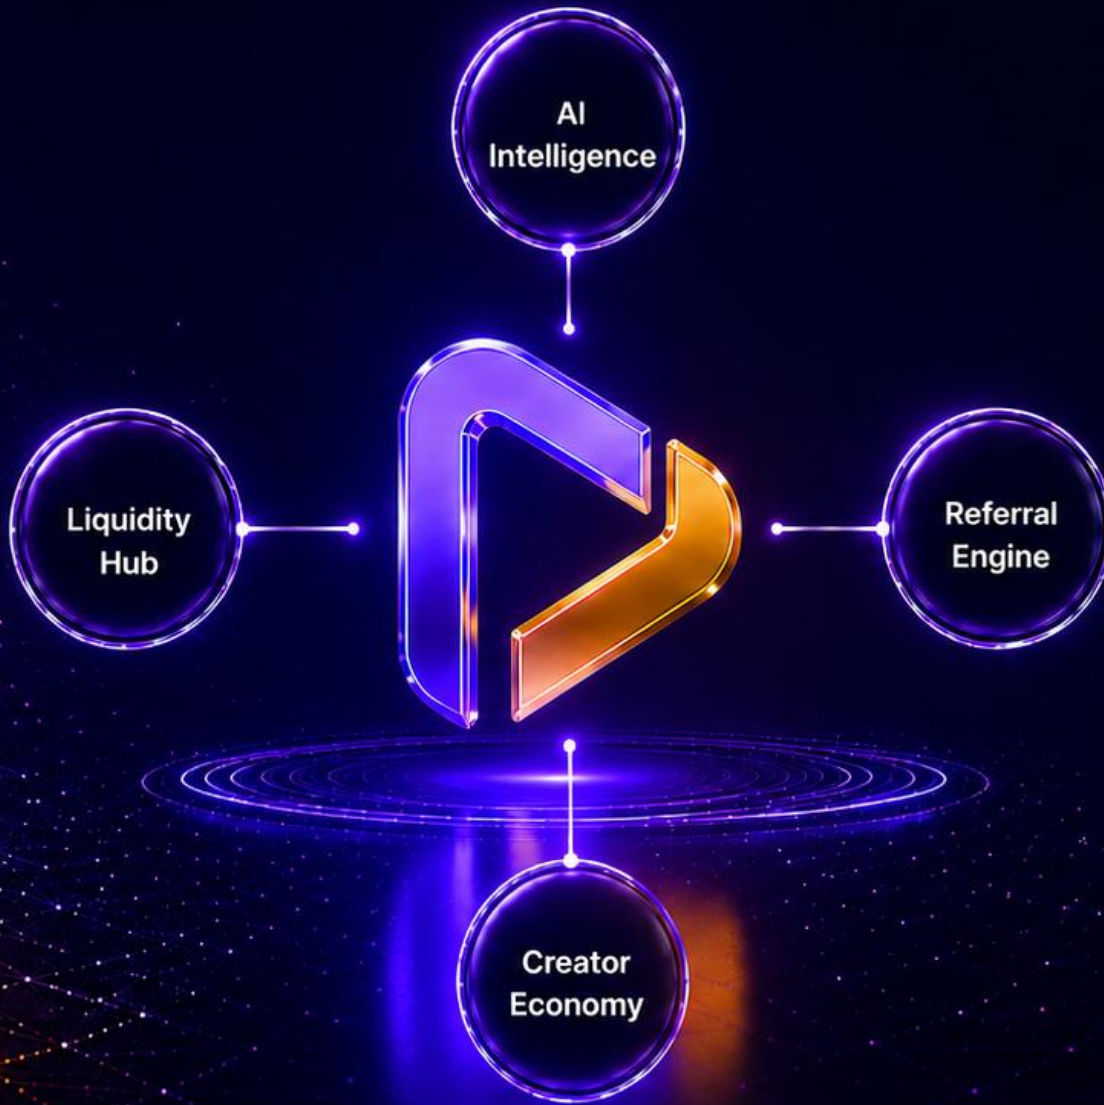

Aggregated liquidity across prediction markets

Referral Engine

Community-driven user acquisition and growth

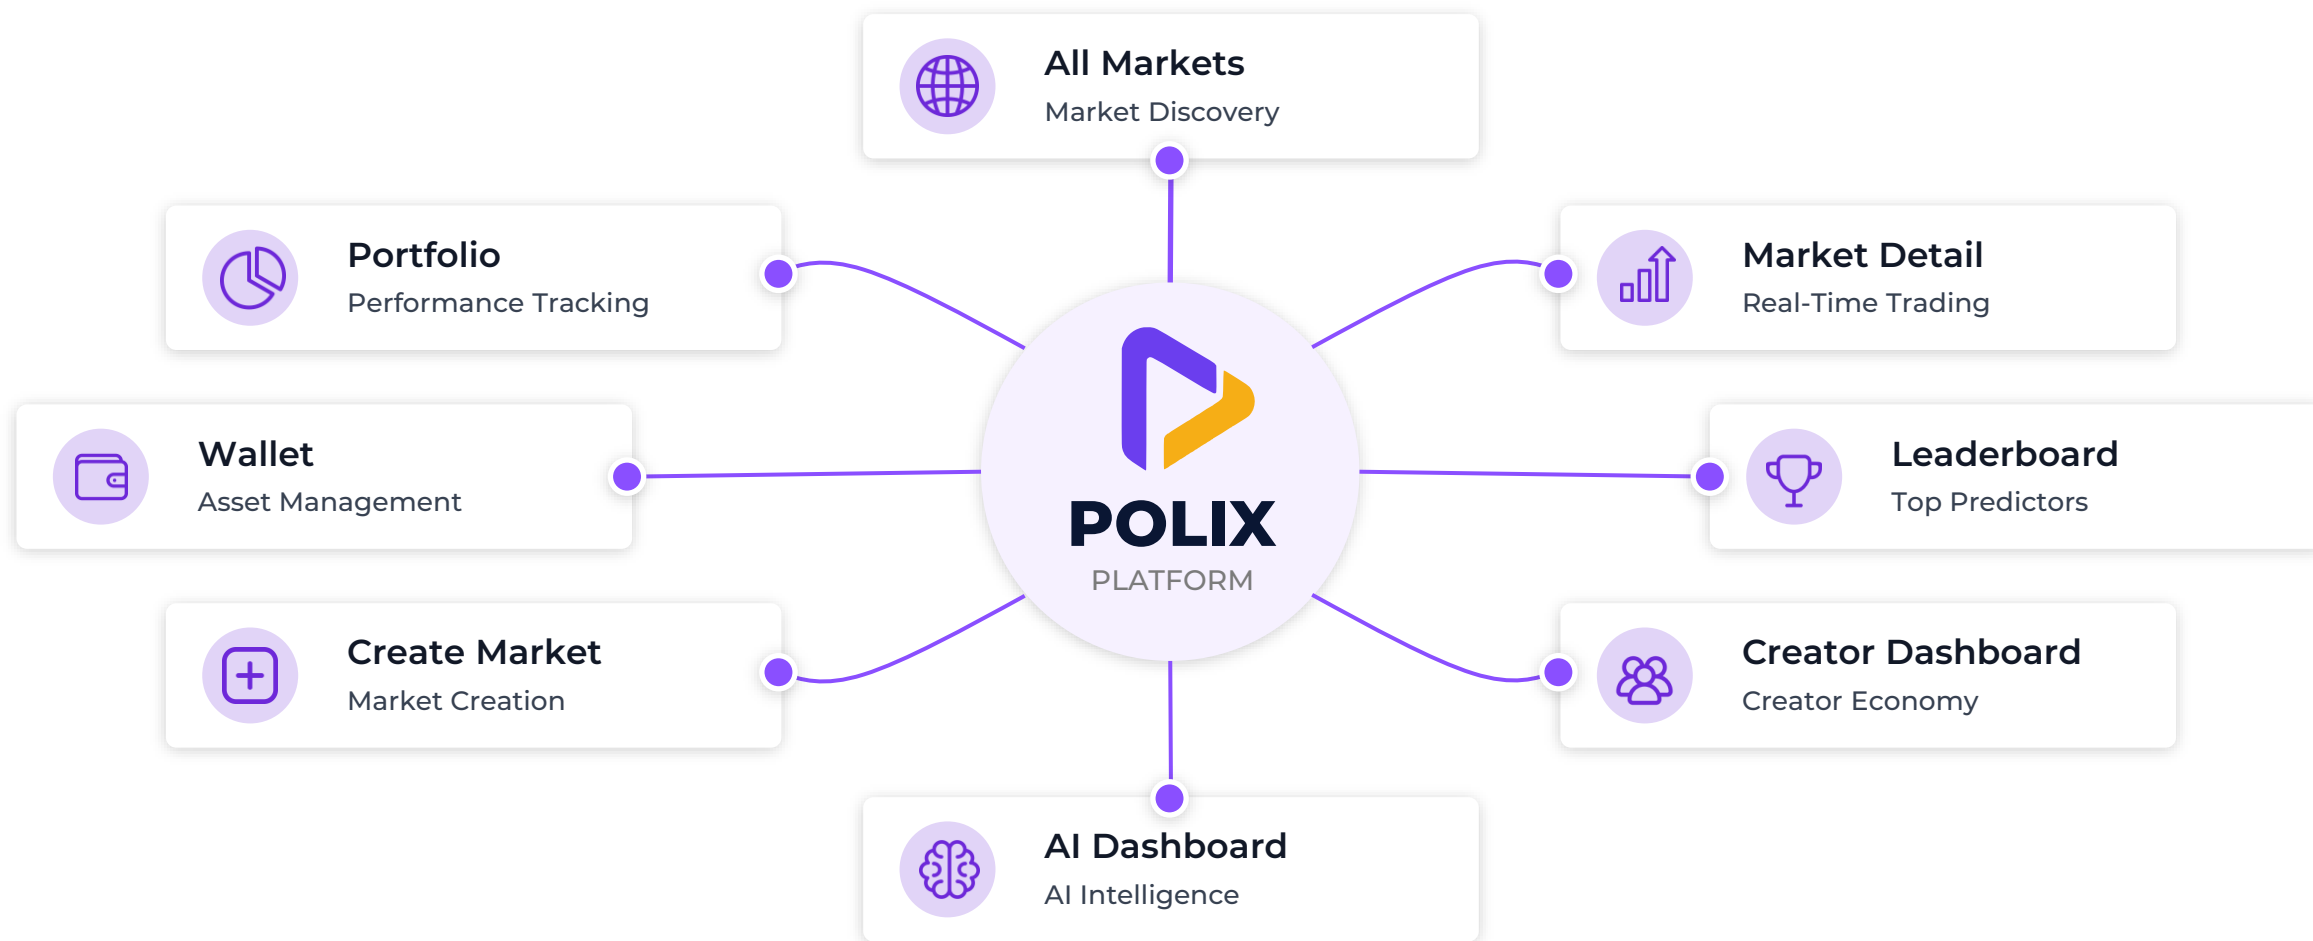

Creator Economy

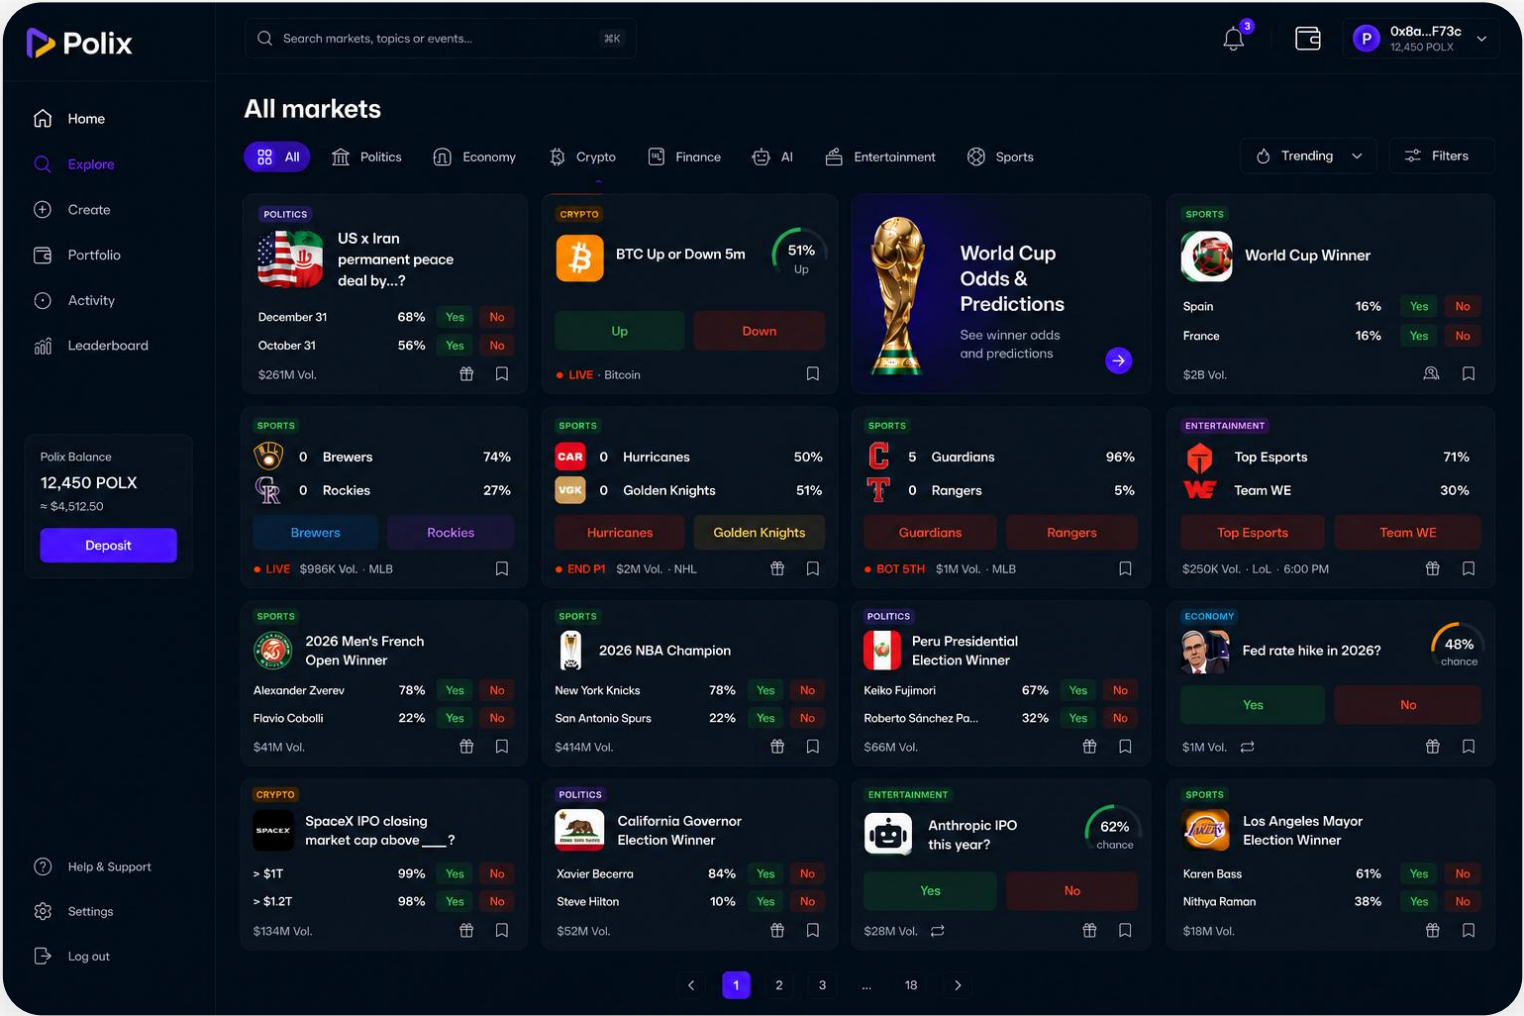

Incentives and revenue sharing for market creators

One Platform. **Eight Core Experiences.**

Everything users need to discover, trade, manage, create, and grow within the POLIX ecosystem.

All Markets

Discover Markets Across Politics, Crypto, AI, Sports and More

Smart Discovery

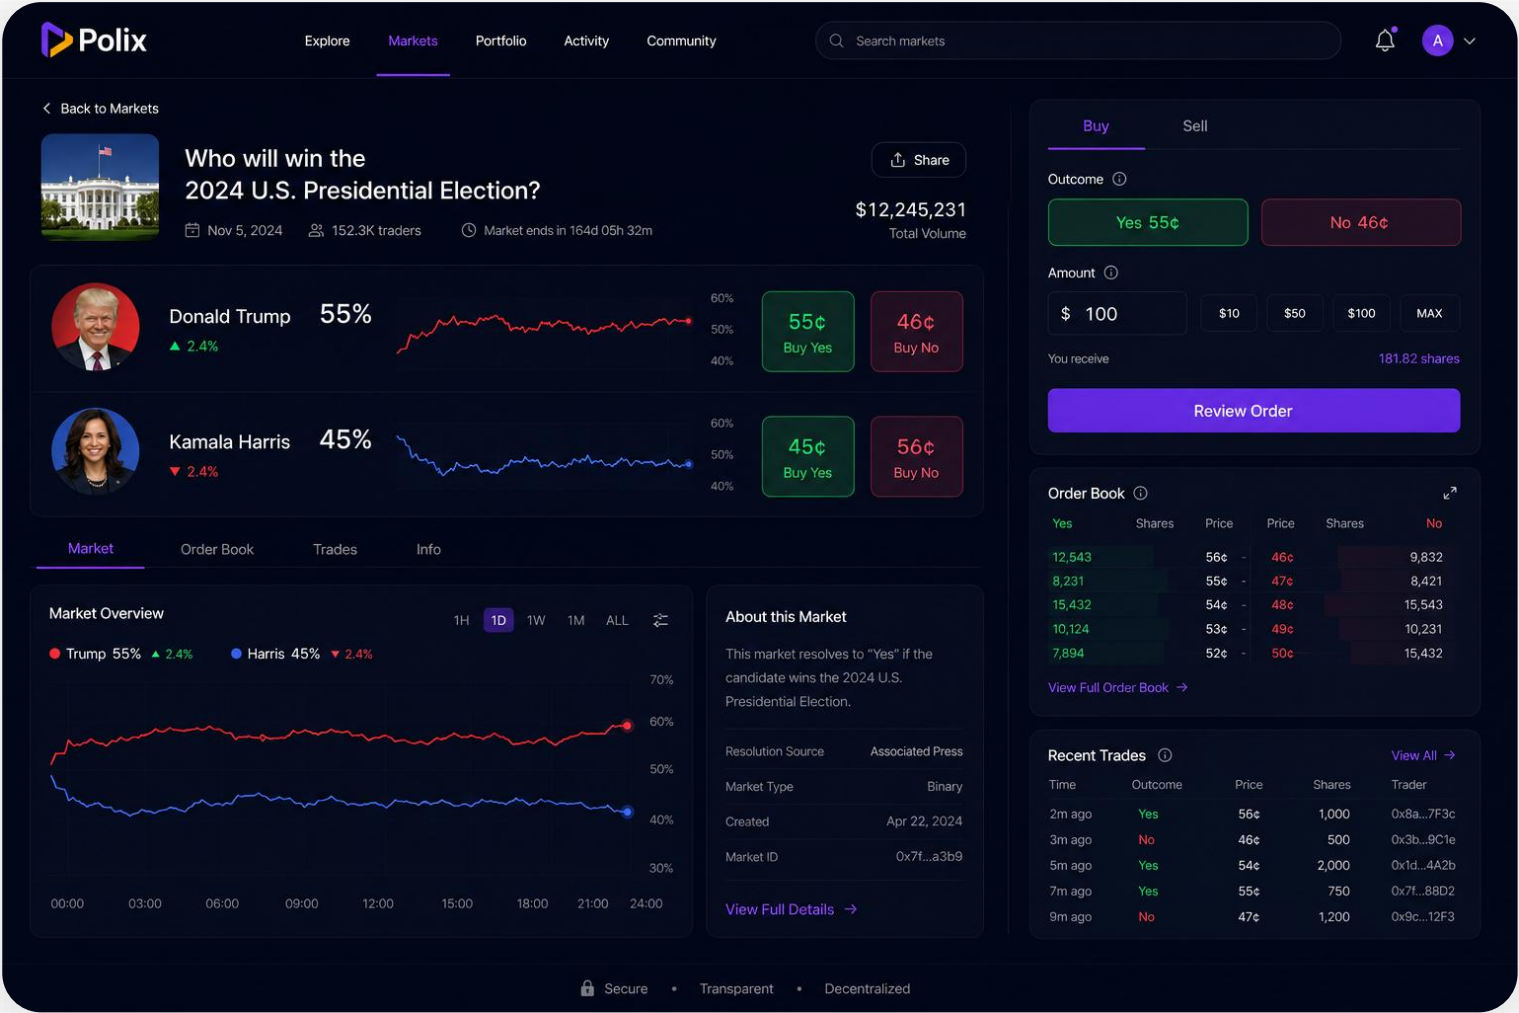

Explore trending and newly created markets across multiple categories.

Real-Time Insights

Track probabilities, trading volume, and market activity in real time.

Advanced Filtering

Quickly find opportunities using categories, search, and popularity filters.

Market Detail

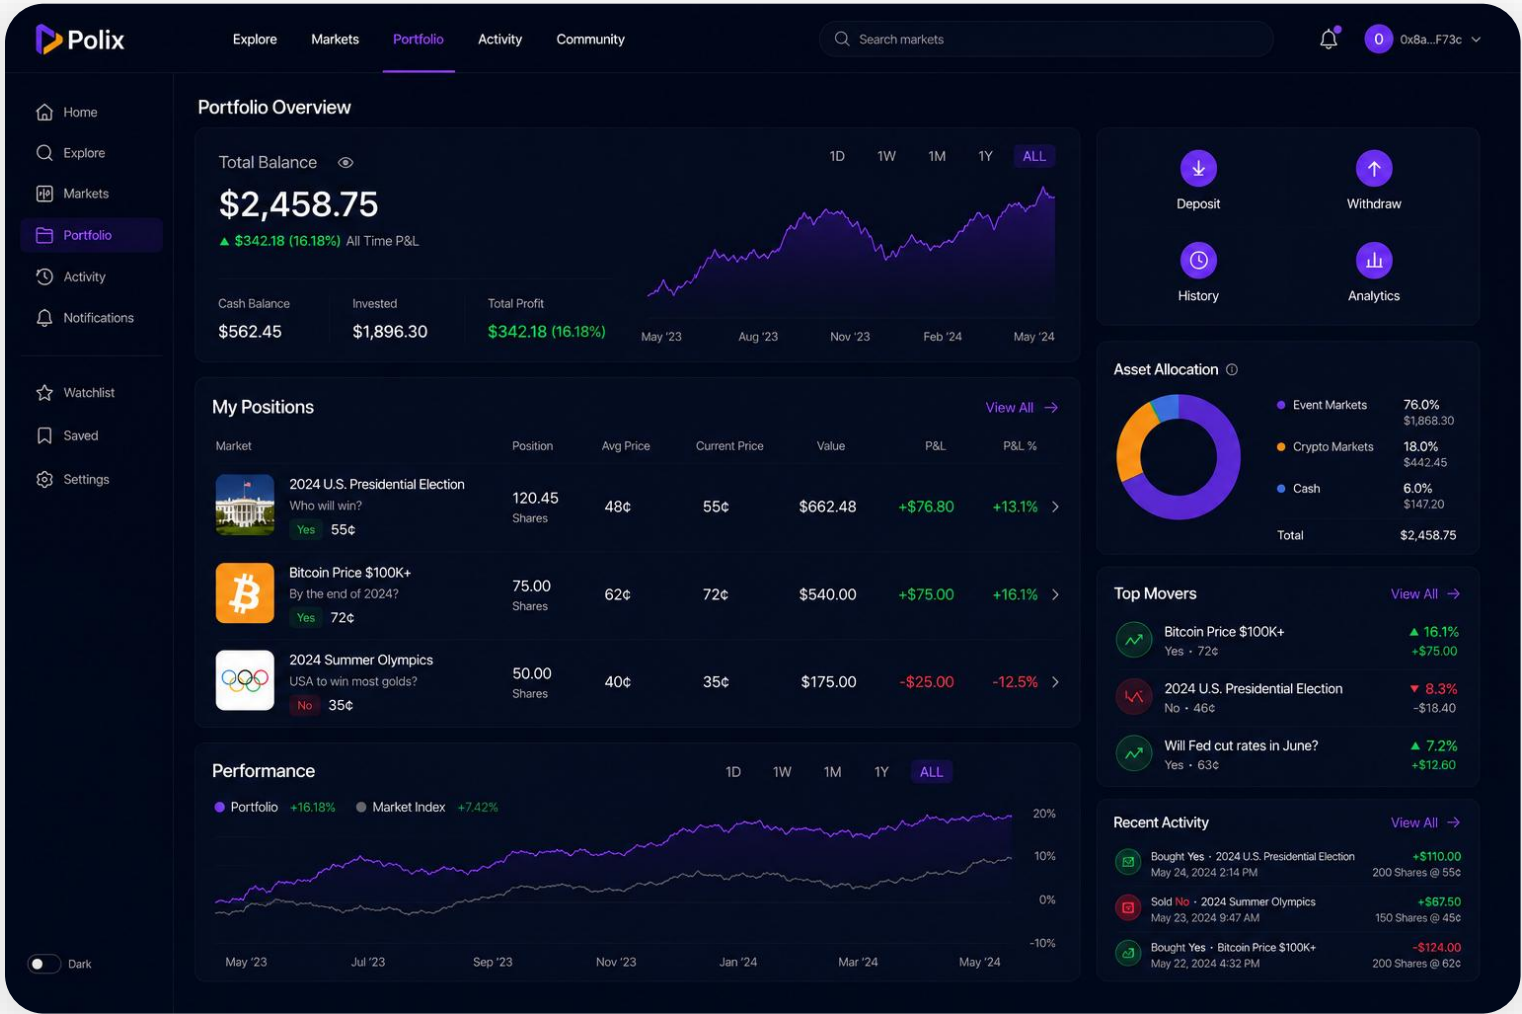

Trade Prediction Markets in Real Time

- ### Real-Time Trading

Buy or sell positions instantly based on changing market probabilities.
- ### Live Probability Tracking

Track probabilities, trading volume, and market activity in real time.
- ### Intuitive Yes / No Trading

Simple binary trading designed for fast and efficient decision-making.

Portfolio

Monitor Positions and Track Performance

Portfolio Overview

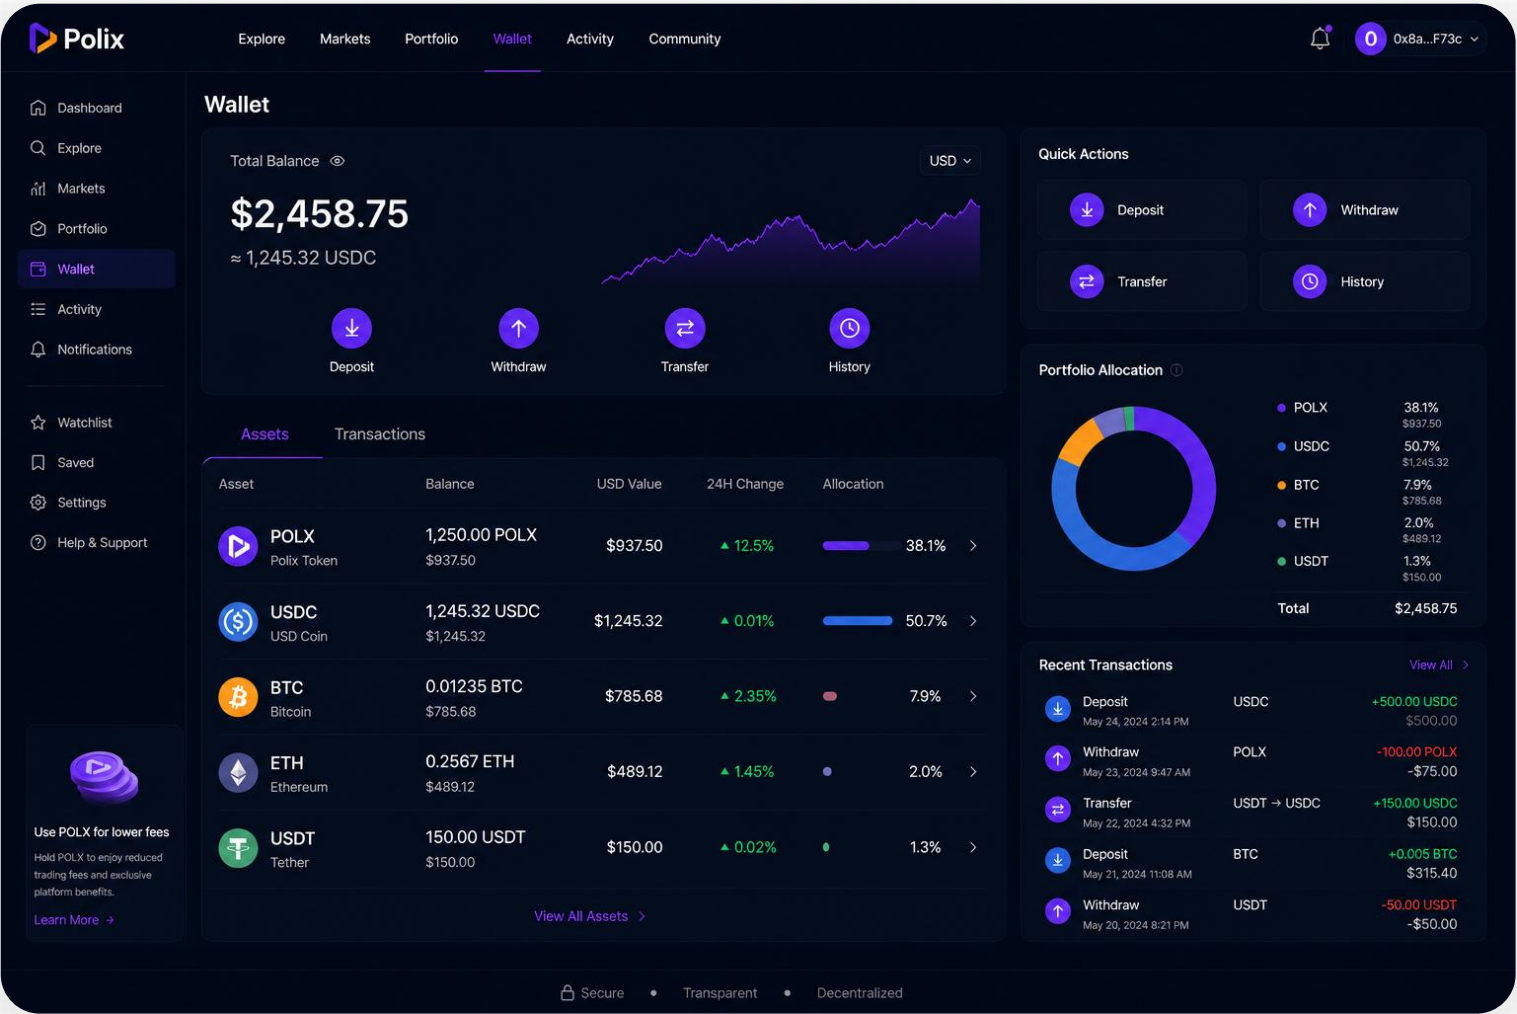

View all active positions and portfolio performance in one place.

Profit & Loss Tracking

Track realized and unrealized gains with detailed performance metrics.

Position Management

Monitor open positions and track exposure across multiple markets.

Wallet

Manage Assets and Funds with Confidence

Asset Management

Monitor balances and holdings across all supported platform assets.

Secure Transactions

Deposit and withdraw funds securely with transparent transaction records.

Wallet Overview

Track account activity and asset movements in real time.

Tips for creating a good market

Keep your question clear, specific, and unbiased.

Choose the right category to reach the right audience.

Add enough liquidity to attract traders.

Provide an image for better engagement.

Create Market

Build and Launch Prediction Markets

User-Generated Markets

Create custom prediction markets around topics and events you care about.

Simple Creation Flow

Launch new markets through an intuitive step-by-step process.

Community Participation

Enable users to trade, engage, and contribute market liquidity.

Leaderboard

Track Top Traders and Discover High-Performing Predictors

Top Predictors

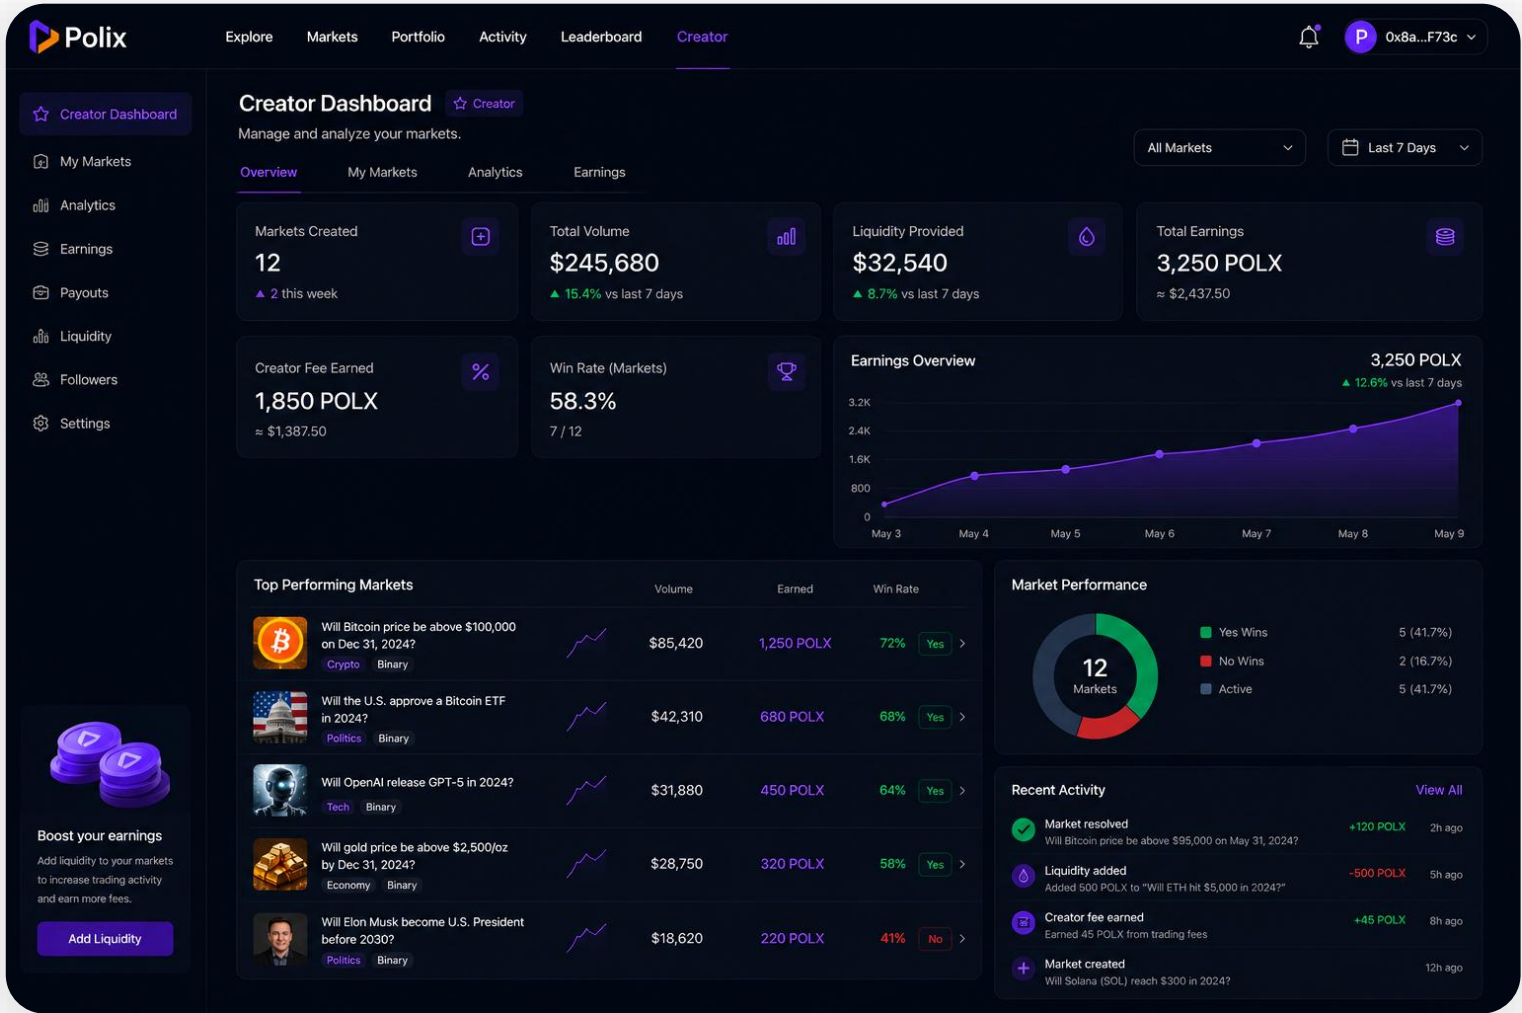

Identify the most accurate traders based on prediction performance and success rates.

Performance Rankings

Compare profitability, win rates, and historical prediction accuracy in real time.

Social Trading Insights

Discover market leaders and gain insights from the platform's top performers.

Creator Dashboard

Creator Economy in Action

Creator Analytics

Monitor market performance, engagement, volume, and audience growth in real time.

Revenue & Rewards

Track creator earnings, incentive programs, and market-generated rewards.

Community Growth

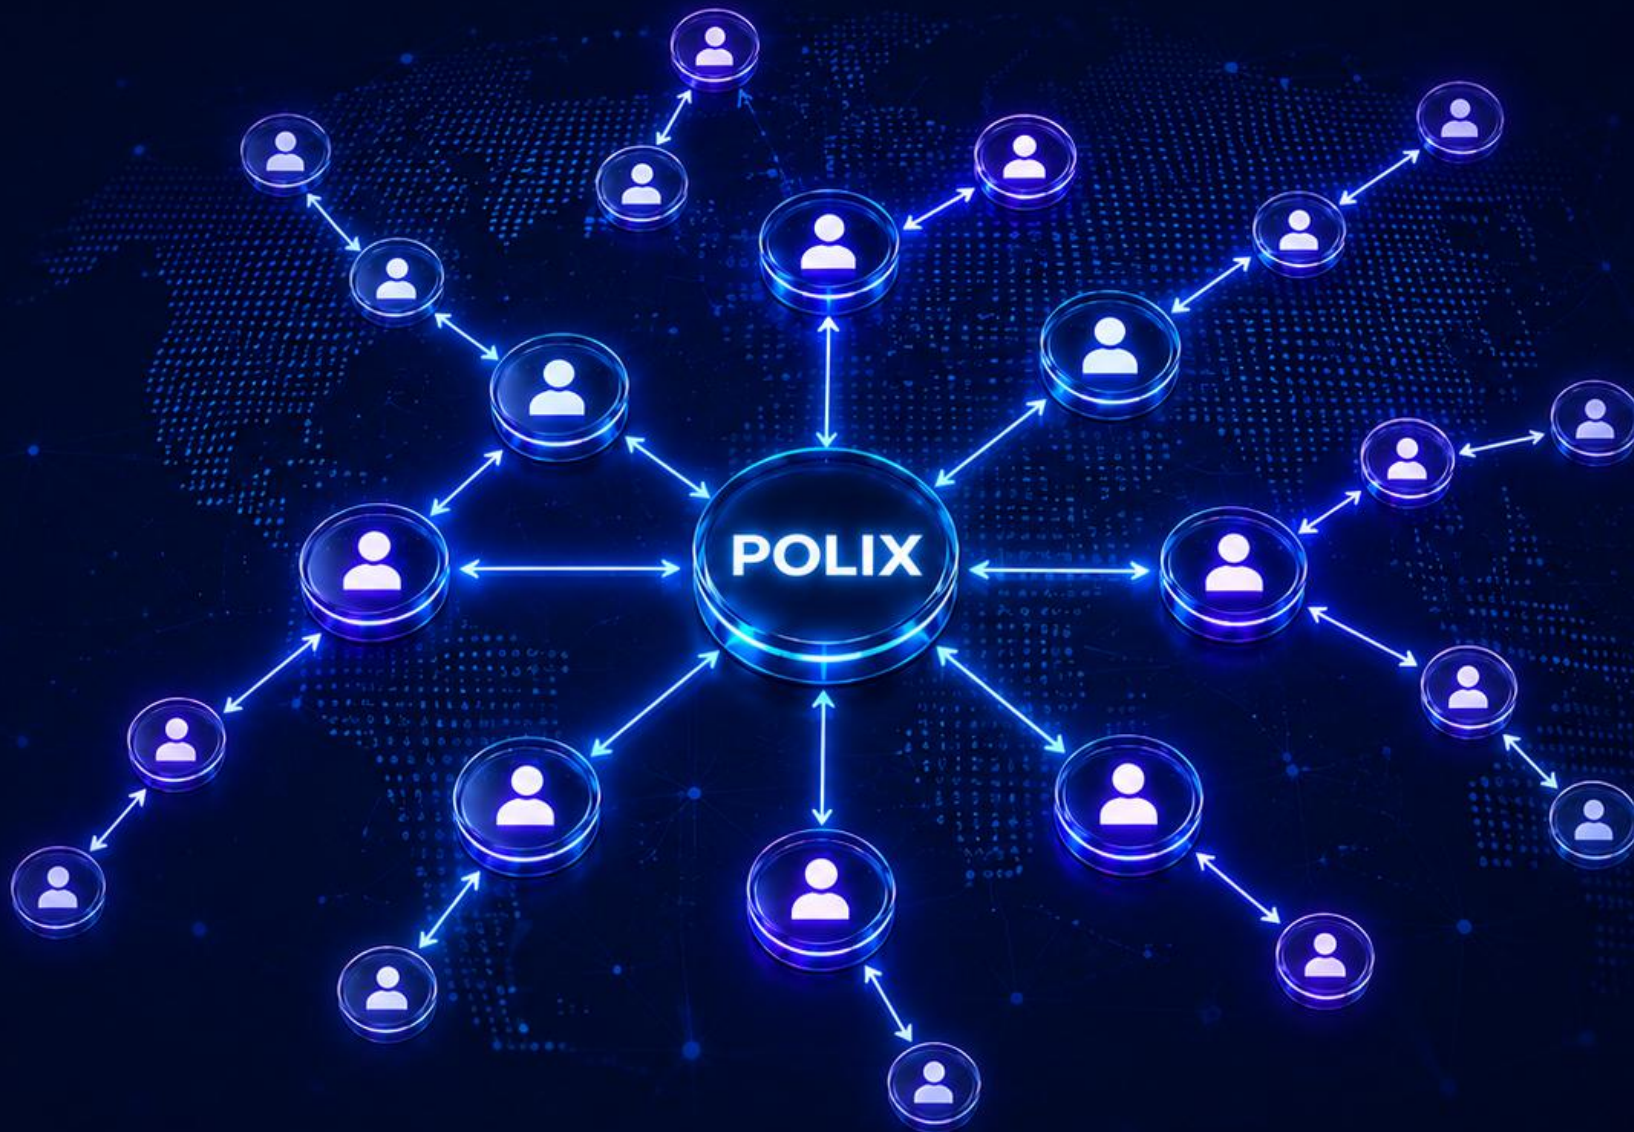

Build loyal communities and expand influence through creator-driven markets.

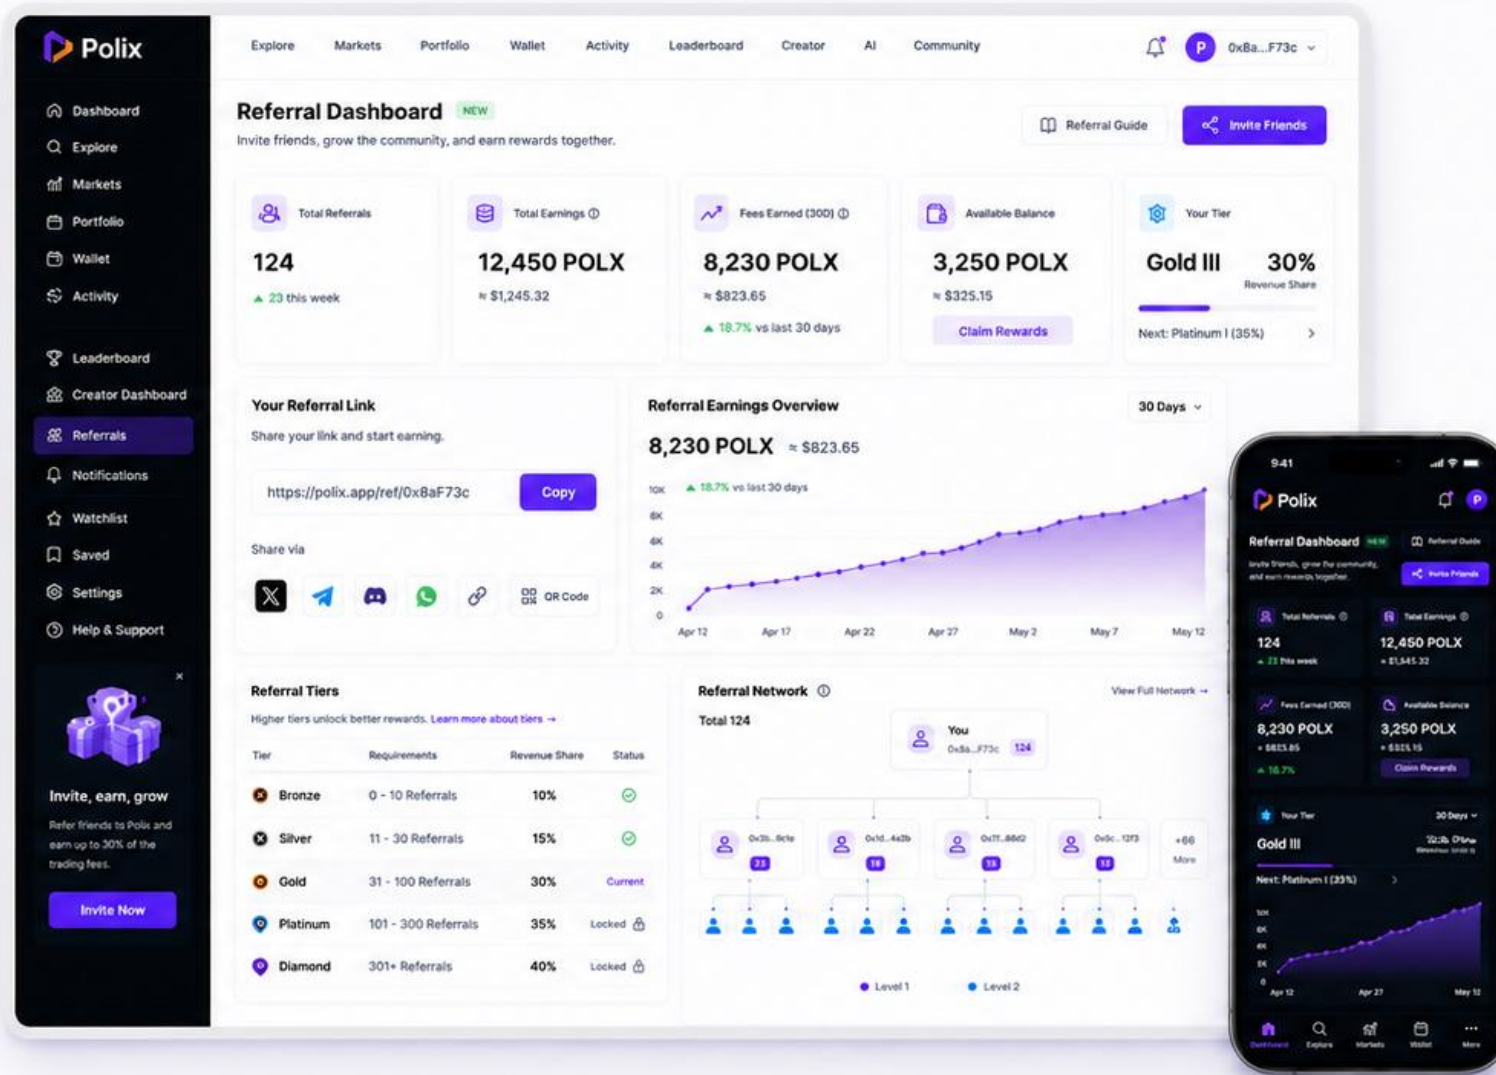

Referral Engine

Turning Every User Into
a Growth Partner

A scalable referral ecosystem that
transforms users into advocates,
creators, and growth drivers.

- Lower Acquisition Cost
- Viral Growth Loops
- Community Ownership

Referral Dashboard

Track referrals, rewards, and network growth in real time

Monitor referral performance, earnings, and community expansion through a unified dashboard designed for transparency, engagement, and long-term growth.

Prediction Master Program

A Tiered Referral System Designed For Sustainable Growth

Referral Growth Flywheel

A Self-Reinforcing Growth Loop
Powered by Community Incentives

Every participant can become a growth driver.

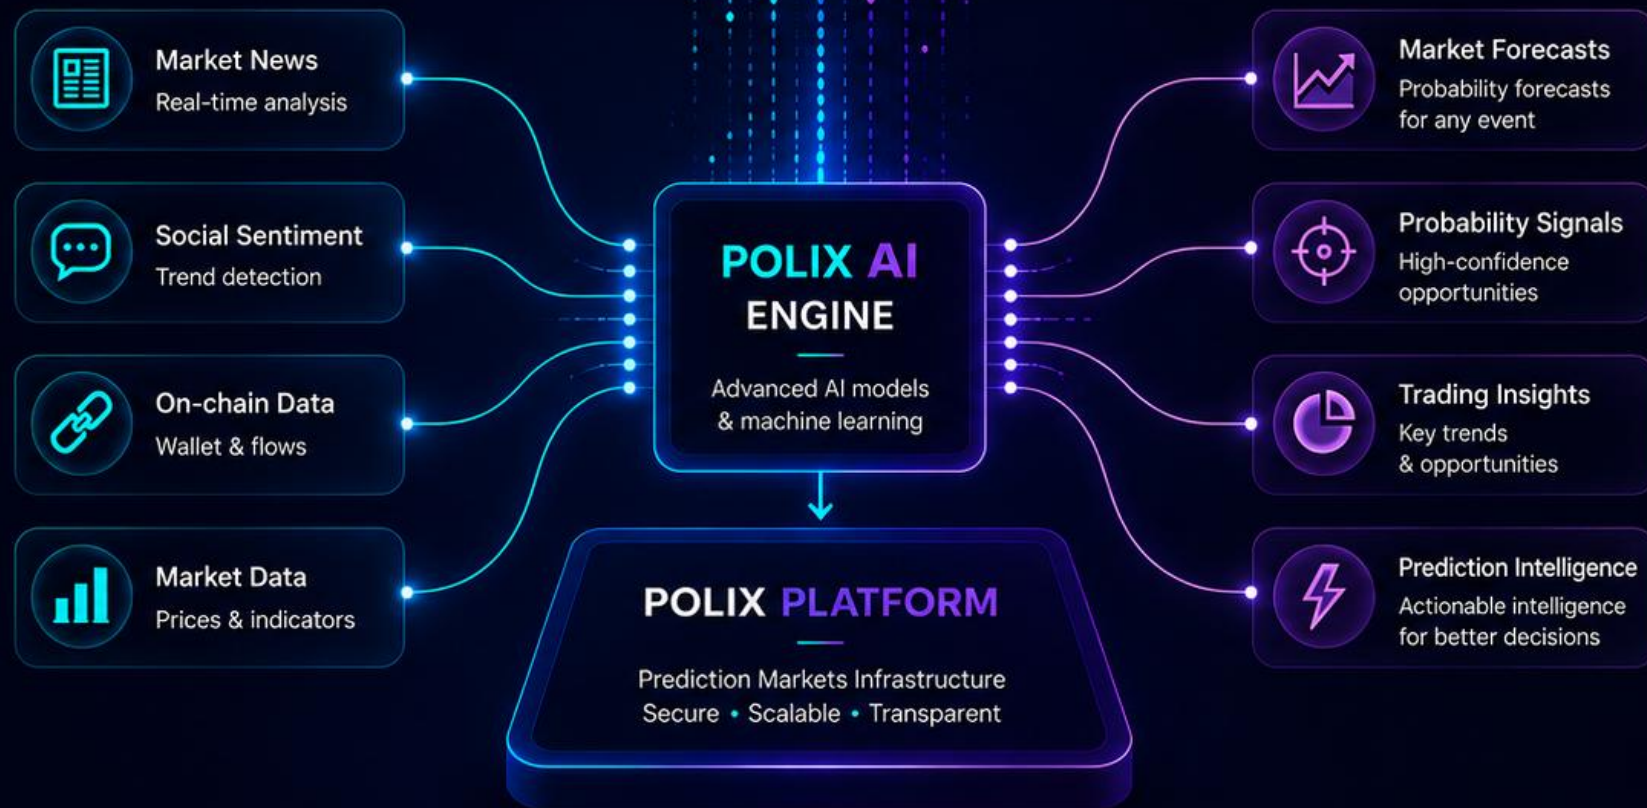

As users invite new traders, platform activity increases, trading volume expands, rewards grow, and the referral network attracts even more participants.

This creates a scalable and sustainable growth engine for the POLIX ecosystem.

AI Copy & Follow

Follow Proven Predictors With AI Confidence

POLIX AI evaluates predictor performance, forecasting accuracy, and risk profiles in real time. Users can instantly follow verified top performers and automatically replicate their prediction strategies through a transparent, data-driven workflow.

AI-Powered Ecosystem

Driving Growth Across The Entire Platform

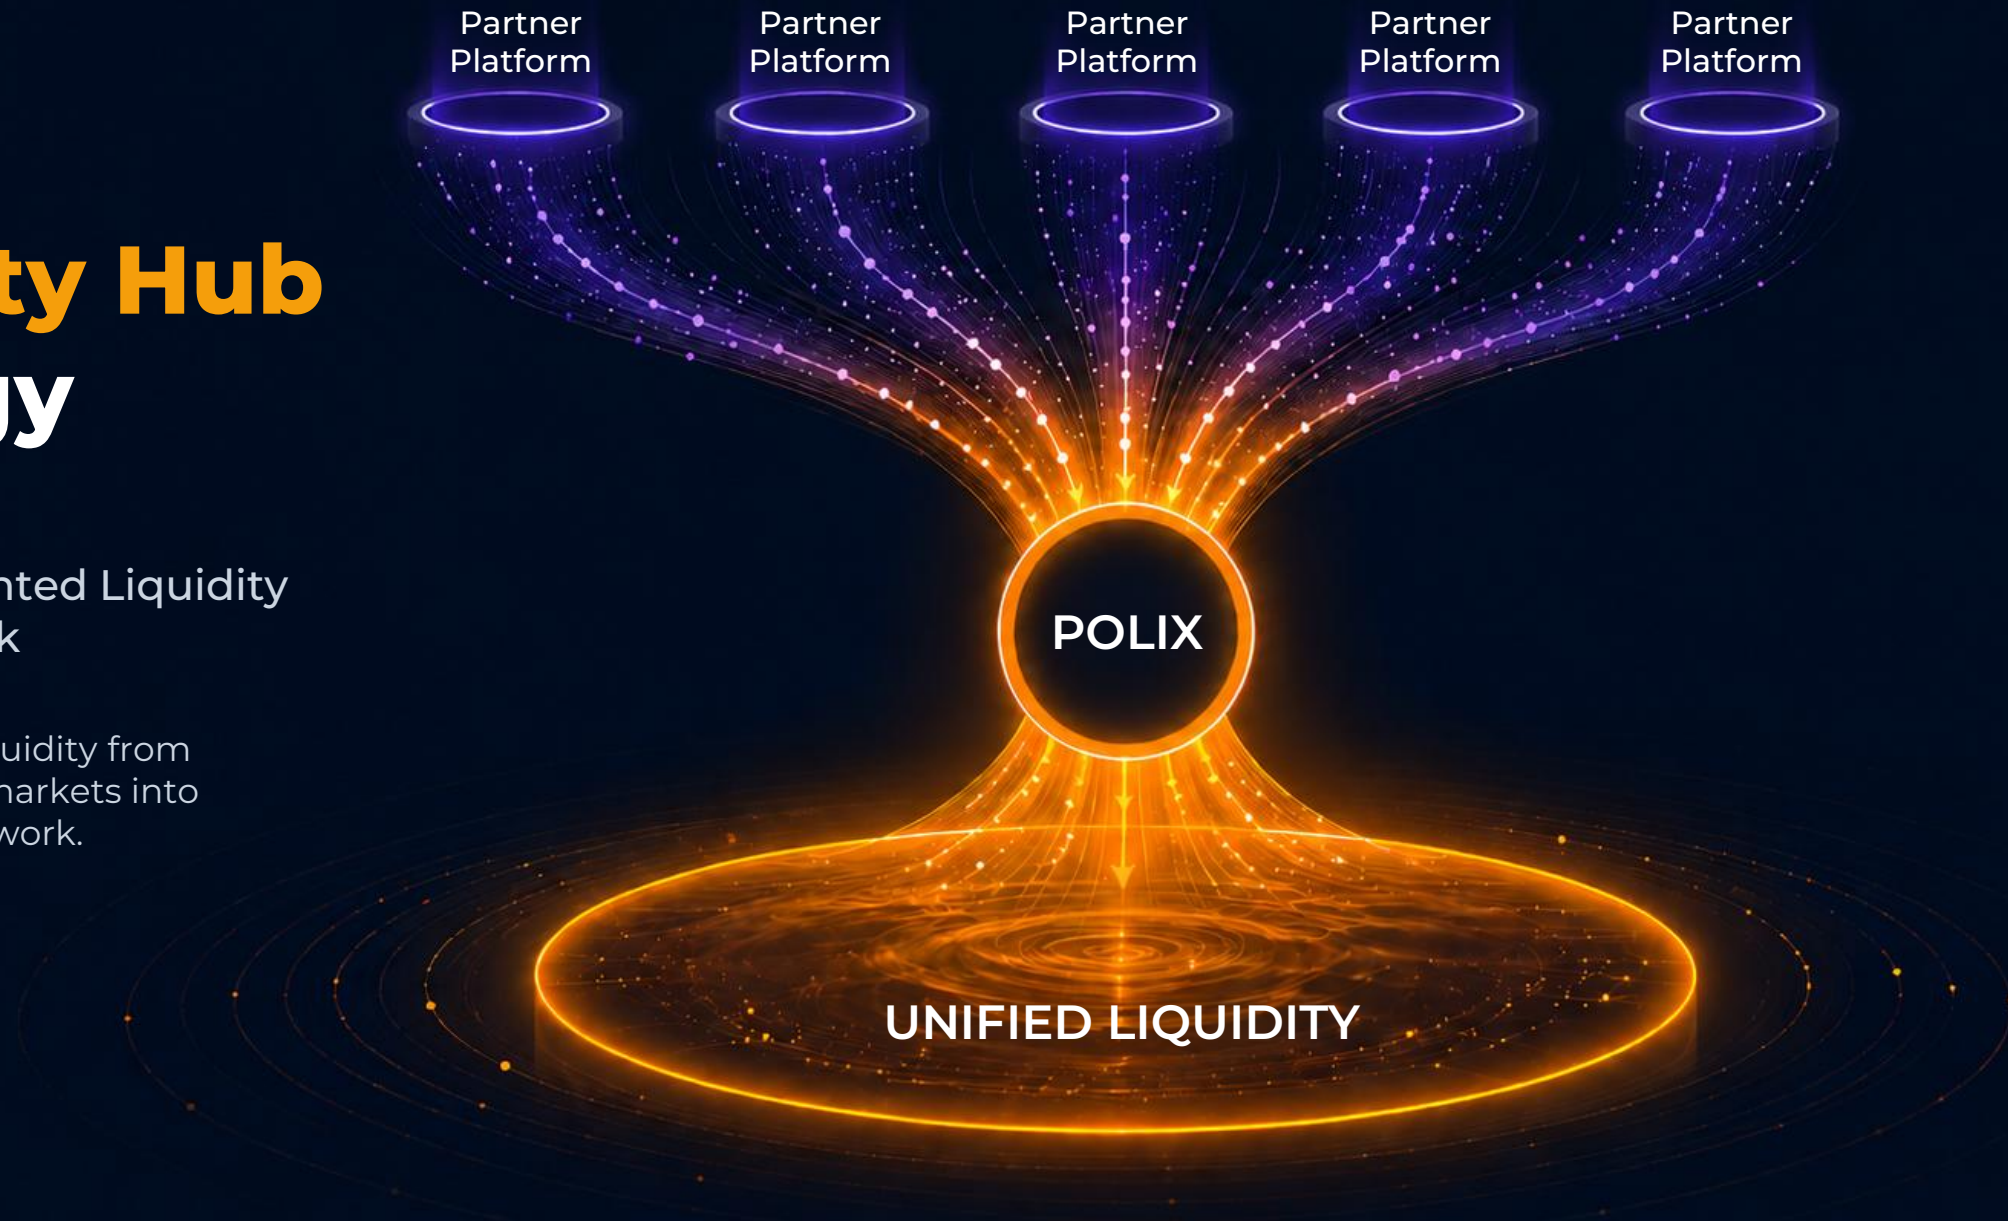

AI powers every core component of the POLIX ecosystem, driving growth, engagement, and market efficiency.

Liquidity Hub Strategy

Turning Fragmented Liquidity
into One Network

POLIX aggregates liquidity from
multiple prediction markets into
a unified trading network.

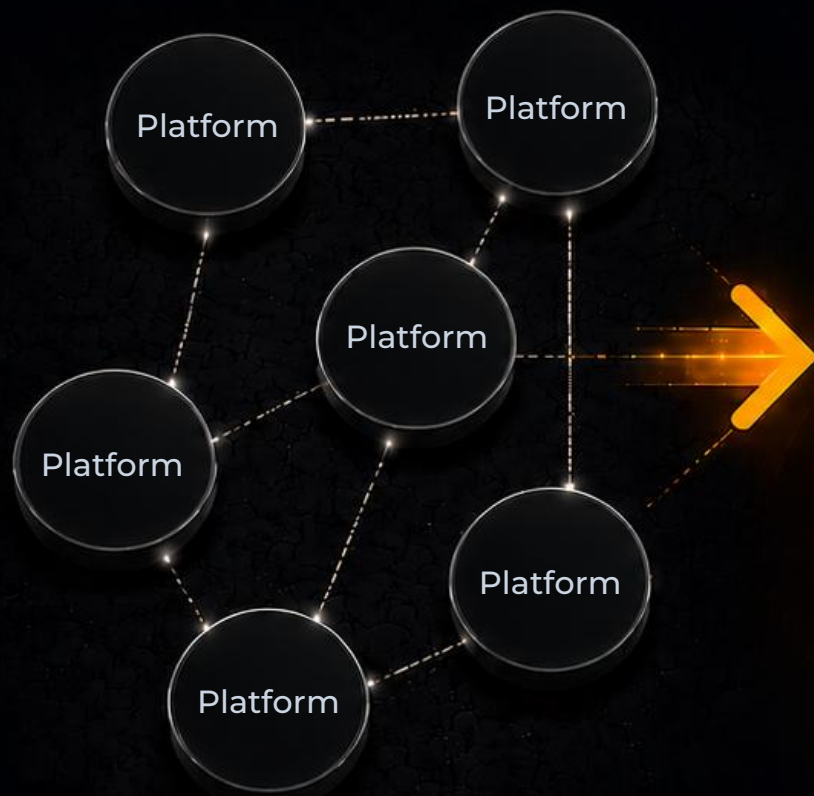

The Liquidity Challenge

Why most prediction markets struggle to scale

Without sufficient liquidity, markets become inefficient, participation declines, and long-term growth becomes difficult.

BEFORE

Fragmented Liquidity

**AFTER**

Unified Liquidity

The POLIX Solution

—
A Liquidity Hub for
Prediction Markets

POLIX aggregates liquidity from multiple prediction platforms into a unified network, creating deeper markets, tighter spreads, and stronger participation.

Prediction Market Alliance Network

A Collaborative Network Powered
by Shared AI and Growth

POLIX empowers emerging prediction platforms with AI intelligence, analytics, and growth tools through a collaborative alliance network.

Together, we build a stronger ecosystem where innovation, data, and intelligence drive shared growth for all.

BENEFITS FOR PARTNER PLATFORMS

AI Trading Bots

Access powerful AI trading bots and automated strategies designed for prediction markets.

Market Analytics

Leverage advanced analytics and forecasting insights to make smarter market decisions.

Discovery Engine

Discover emerging markets and high-potential opportunities across the entire ecosystem.

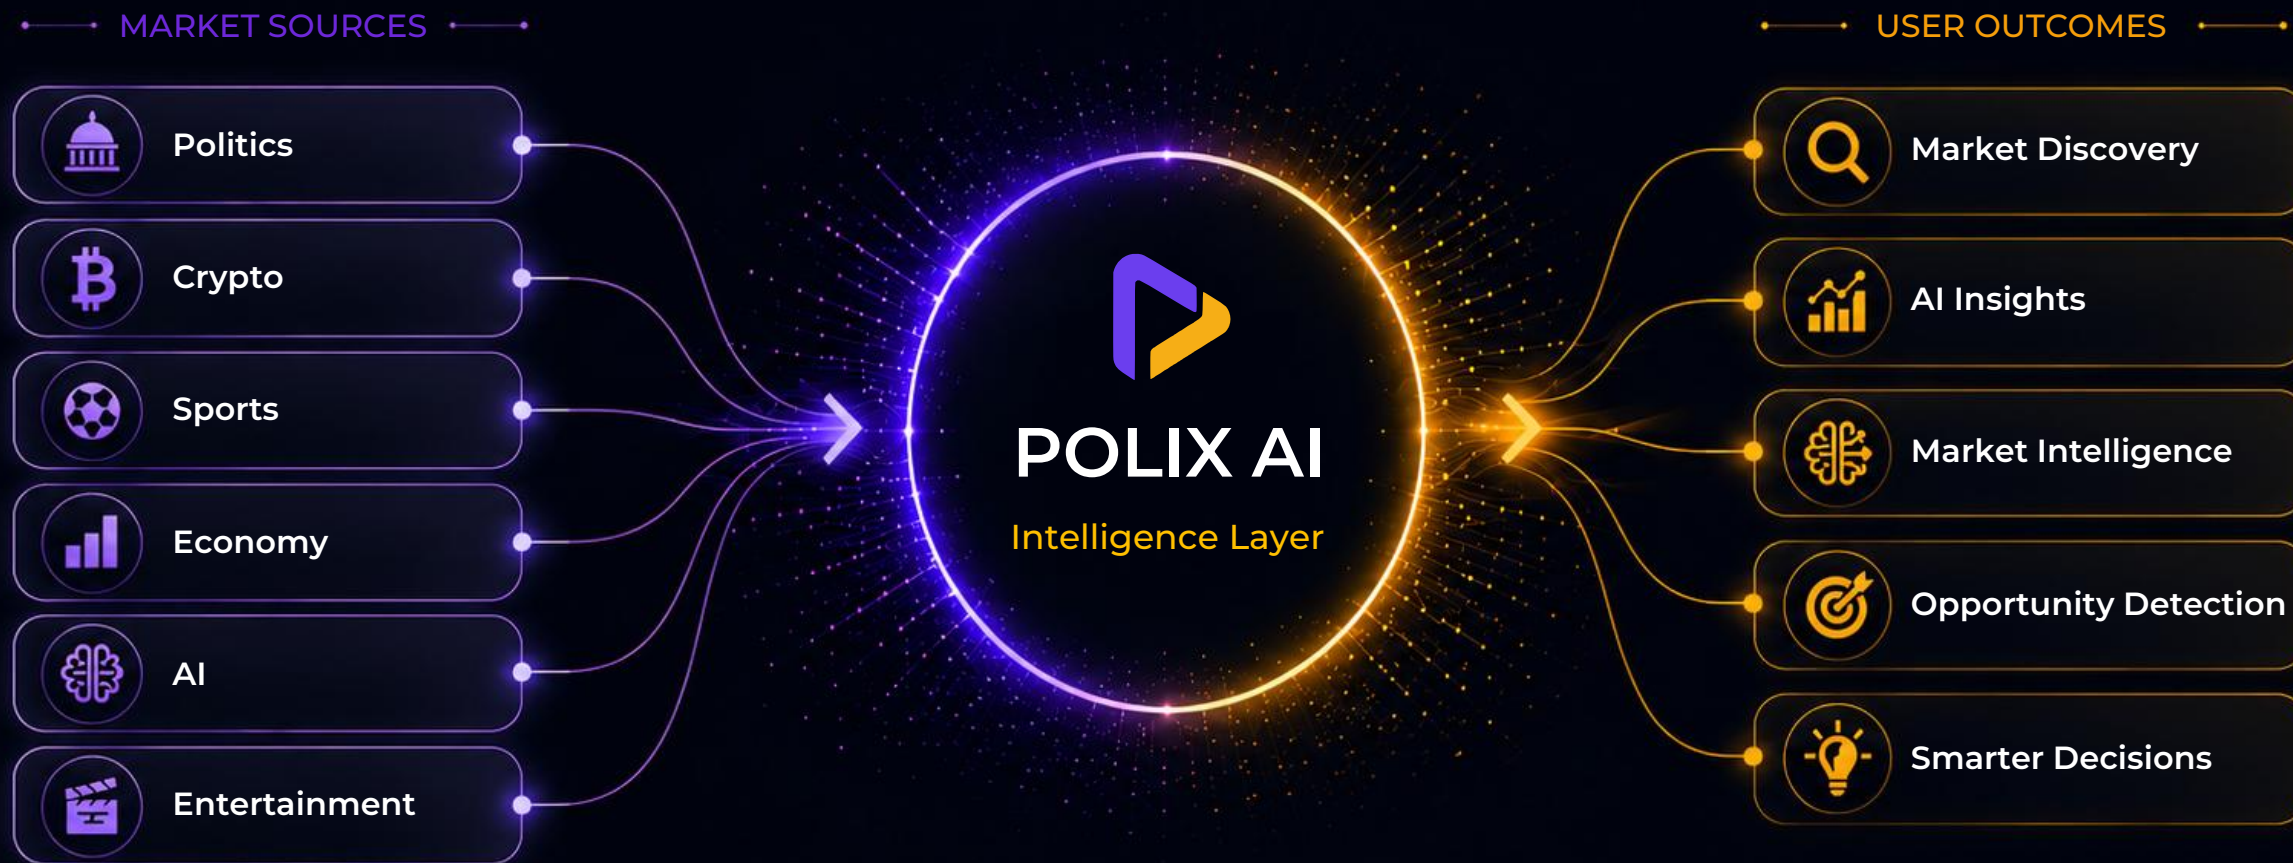

Growth Tools

Utilize growth tools and resources to expand your user base and accelerate platform growth.

Unified Market Intelligence

One Interface. Multiple Markets. Smarter Discovery

POLIX transforms fragmented prediction markets into a unified intelligence layer.
Users can discover opportunities faster through AI-powered market insights.

01

MARKET CREATORS

Creating diverse and
engaging prediction
markets

02

COMMUNITY BUILDERS

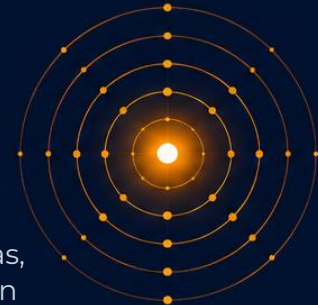

Building and growing
communities around
market participation

03

ECOSYSTEM GROWTH

Driving liquidity, activity,
and sustainable
ecosystem expansion

CREATOR ECONOMY

Empowering Market Creators to Build
the Future of Prediction Markets

Prediction markets thrive when creators
continuously introduce new ideas, events,
and opportunities.

POLIX transforms market creation into an
incentivized economy where creators can
launch markets, build communities, and
contribute to sustainable ecosystem growth.

Market Creators Drive Ecosystem Growth

—
Creators are the foundation of market supply in prediction markets

Every new market creates new opportunities for participation, engagement, and liquidity.

Incentivized creators continuously expand the breadth and depth of the POLIX ecosystem.

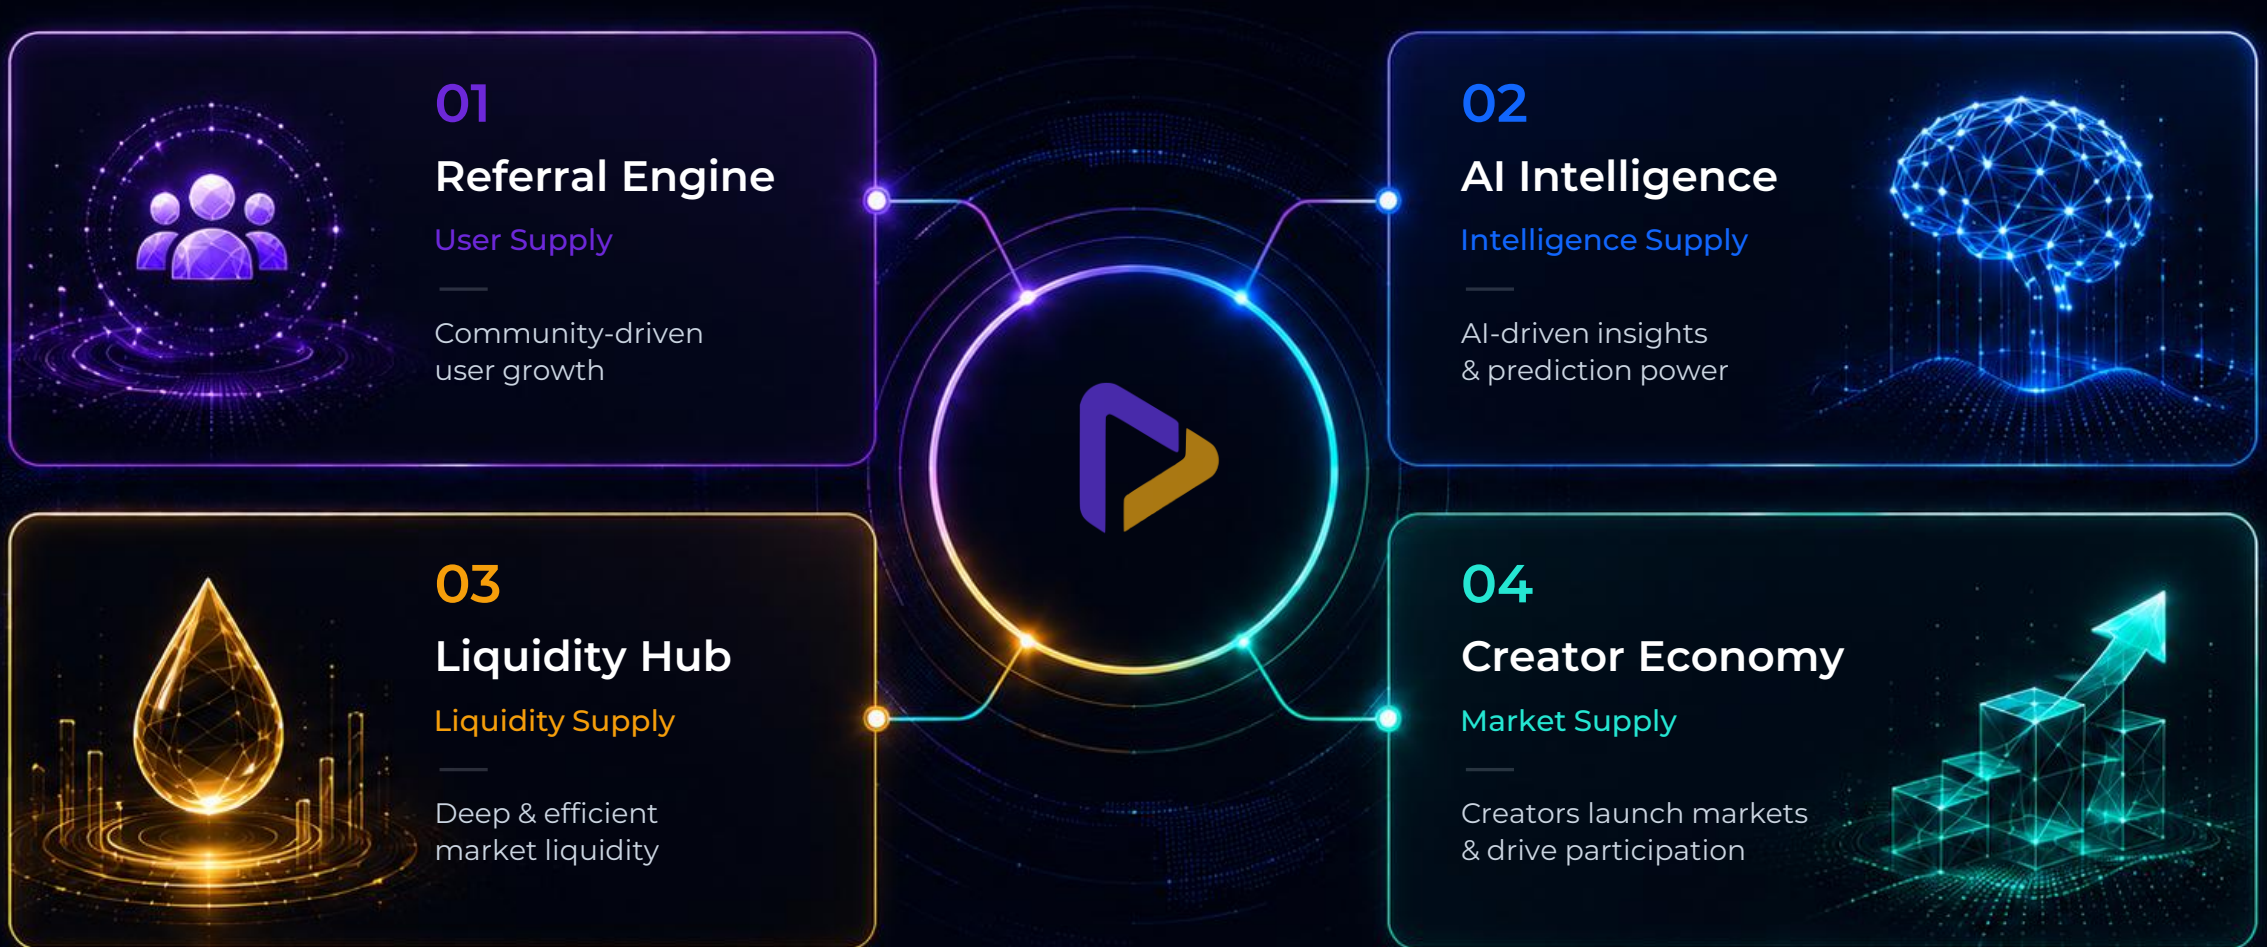

Creator Incentive Flywheel

—
A self-reinforcing creator economy drives sustainable ecosystem expansion

The Four Engines of the **POLIX** Ecosystem

Four interconnected supply engines powering the POLIX ecosystem.

POLX Token Utility

The economic layer powering incentives, participation, and ecosystem growth.

The Future of Prediction Markets

From fragmented prediction platforms to an intelligent prediction economy.

User Supply + Market Supply + Liquidity Supply + Intelligence Supply = The Future of Prediction Markets
